IFRS, within the meaning of the Law, are:

- The Framework for the preparation and presentation of financial statements,
- International Accounting Standards – IAS,
- International Financial Reporting Standards - IFRS and related Interpretations, issued by the International Financial Reporting Interpretations Committee, subsequent amendments to these Standards and the related Interpretations, as approved by the International Accounting Standards Committee, the translation of which was adopted and published by the Ministry in charge of finances.

The Company financial statements were presented in the form and with the content specified by the provisions of the Rules on the Contents and Form of Financial Statements' Forms submitted by Companies, Cooperatives and Entrepreneurs (RS Official Gazette, No. 95/2014 and 144/2014). These Rules, among other things, laid down the form and content of individual positions in the Balance Sheet, Income Statement, Other Comprehensive Income Report, Cash Flow Statement, Statement of Changes in Equity and Notes to Financial Statements. Pursuant to the above mentioned Rules, amounts in RSD thousands are to be presented in these forms.

Chart of Accounts and content of accounts in the Chart of Accounts were prescribed by the Rules on Chart of Accounts and Contents of Accounts in the Chart of Accounts for Companies, Cooperatives and Entrepreneurs (RS Official Gazette, No. 95/2014).

In preparation of Company financial statements, the following laws and by-laws were taken into account, among others:

- Law on Corporate Income Tax (RS Official Gazette, No. 25/2001, 80/2002, 43/2003, 84/2004, 18/2010, 101/2011, 119/2012, 47/2013, 108/2013, 68/2014 –other law, 142/2014,91/2015/ – authentic interpretation and 112/2015);

In addition to the above listed, other internal acts of the Company were used, such as, for example, the Collective Agreement of the Company, regulating employment in the country.

The Law on Capital Market (RS Official Gazette, No. 31/2011, 112/2015 and 108/2016) set down mandatory data to be included in the annual, six monthly and quarterly statements of public companies with securities listed in the regulated markets.

It should be noted here that in certain cases, not all the relevant provisions of the IFRS or of the Interpretations thereof were taken into account in preparation of the Company financial statements, which has been explained in detail further in this text.

The accounting regulations of the Republic of Serbia, and thus the presented financial statements of the Company, deviate from IFRS in the following aspects:

- Pursuant to the Law on Accounting (RS Official Gazette, No. 62/2013) , the financial statements in the Republic of Serbia for the year 2014 are to be presented in the format stipulated by the Rules on the Contents and Form of the Financial Statements Forms for Companies, Cooperatives and Entrepreneurs (RS Official Gazette, No. 95/2014 and 144/2014), which deviates from the presentation and names of certain general purpose financial statements, as well as from the presentation of certain balance positions stipulated by the Revised IAS 1 – “Presentation of Financial Statements“; and
- Off-balance assets and off-balance liabilities were presented in the Balance Sheet form. According to the IFRS definition, these items are neither assets, nor liabilities.

In addition to the above stated, some deviations were due to the different publishing dates of the Standards and the relevant Interpretations thereof, which are subject to continuous modifications, and the effective dates when these Standards and relevant Interpretations thereof come into force in the Republic of Serbia. Thus, for example, the deviations from the Standards came as the consequence of the fact that the published Standards and relevant Interpretations, which came into force, have not yet been officially translated or adopted in the Republic of Serbia; as the consequence of the fact that the published Standards and relevant Interpretations have not yet come into force; or as the consequence of some other reasons beyond effective control or influence of the Company, with no significant effect on financial position of the Company nor on its business result.

Functional currency and currency used for data presentation

Amounts presented in financial statements are in thousands of Serbian dinar (RSD). The Company uses RSD as the functional and reporting currency. Transactions effectuated in non-functional currencies shall be treated as transactions effectuated in foreign currencies.

Transactions in foreign currency, upon initial recognition, are registered in dinar counter value by applying the official middle exchange rate on the transaction date.

Pursuant to the provisions of IAS 21 – Changes In Foreign Exchange Rates, monetary items in foreign currency (assets, receivables and liabilities in foreign currency) are recalculated at each balance sheet date by applying the valid exchange rate or the official middle exchange rate at the balance sheet date.

Gain/losses arising on the transaction of foreign currency (apart from those related to monetary items as part of net investments of the Company in foreign business, included pursuant to IAS 21) are recognized as revenues or expenses of the Company for the period in which they occurred.

The official middle currency exchange rates of the National Bank of Serbia used for recalculation of monetary assets and liabilities were as follows:

Currency	June 30, 2017	December 31, 2016	June 30, 2016	December 31, 2015
	<i>Amount in RSD</i>			
EUR 1	120,8486	123.4723	123,3115	121.6261
USD 1	105,6461	117.1353	111,0714	111.2468
GBP 1	137,4842	143.8065	148,7473	164.9391

5. MANAGEMENT EVALUATION AND JUDGEMENTS

Preparation and presentation of financial statements in compliance with valid legislation of Republic of Serbia, requires that the management of the Company performs assessments, provides judgements and assumptions that are reflected on the reported amounts of assets, liabilities, income and expenses. Although, achieved results may differ from the estimated ones, evaluation and judgements are based on information available as at balance sheet date.

The most important valuations refer to the impairment of financial and non-financial assets and definition of assumptions, necessary for actuarial calculation of long-term compensations to employees based on the retirement bonus.

Within the context of valuation, the business policy of the Company is to disclose information on the **fair value** of assets and liabilities, if the fair value varies significantly from the accounting value. In the Republic of Serbia, a reliable valuation of the fair value of assets and liabilities presents a common problem due to an insufficiently developed financial market, lack of stability and liquidity in sales and purchases of, for example, financial assets and liabilities, and sometimes unavailability of market information. Despite all the above, the Company pays close attention to these problems and its management performs continuous valuations, considering the risks. If it is established that the recoverable (fair or value in use) value of assets in business books of the Company was overstated, the adjustment of value is applied.

6. OVERVIEW OF PRINCIPAL ACCOUNTING POLICIES

The basic accounting policies applied in preparation of these financial statements, which were primarily based on the Rulebook on Accounting and Accounting Policies of the Company, are in line with the accounting policies applied in preparation of the financial statements for the year that ended on December 31, 2016, and were applied consistently to all the presented years, unless specified otherwise.

In cases where certain bookkeeping aspects were not regulated clearly by the provisions of the Rulebook on Accounting and Accounting Policies of the Company, the accounting policies based on the currently applicable IFRS were applied.

On December 31, 2016 the residual value and the remaining useful lifetime for the property and equipment with significant accounting value were evaluated, based on which depreciation costs were calculated for the reporting period.

Assessment of Fair Value of Buildings

The fair value of buildings is usually the market value thereof that is established through valuation performed by independent qualified valutors based on market evidence.

In cases where there are no evidence of the fair value of the property in the market, due to the specific nature of the building and because such items are rarely put on sale, the Company performs valuation of fair value of the property by using the income approach or the depreciated replacement cost approach.

The Company in its business books registered "Office building Energoprojekt" carried at revalued amount at the assessment date.

The Energoprojekt building was booked at the revalorized value as at June 30, 2017 in the amount of RSD 1,319,339 thousand, i.e, it was performed by reducing the last assessment of the fair value for depreciation accumulated. The ultimate valuation was performed on December 31, 2016 by an external independent qualified valuer by using the comparative method.

Starting from the appraised fair value of the building in question as at December 31, 2016, residual value as at December 31, 2016 and established remaining useful lifetime (100 years; remaining useful life as at June 30, 2017: 65 years), the depreciation cost for this building in the reporting period, due to the residual value that is lower than its fair value, amounts to RSD 6,246 thousand.

Adjustment of the opening and closing balance of the value of buildings is presented in the following table.

In RSD thousand

No.	Building	Opening balance	Residual value as at balance sheet date	Remaining useful life	Depreciation	Profit / (losses) included in report on "Other Income"	Closing balance

	TOTAL	1.325.585	503.743	65	6.246		1.319.339

As at June 30, 2017, the Company has no property or equipment mortgaged or taken as lien to be used as collateral for financial obligations.

Advances for property, plant and equipment in the amount of RSD 45,905 thousand, refer primarily to the advance paid to the Republic of Serbia for the purchase of properties in Uganda, Peru and Nigeria in the amount of RSD 45,560 thousand.

In its books, the Company posted the fair value of its investment property according to its value determined by means of its fair value assessment as at December 31, 2016.

Valuation of the fair value of investment property as at December 31, 2016 was performed by independent valuers holding recognized and relevant professional qualifications and recent relevant work experience with relevant locations and categories of investment property appraised. Due to the current situation on the property market at the time when the assessment was performed and the

reduced number of sales transactions compared with previous years due to the economic crisis, the valuers mostly relied on their knowledge of the market and professional judgment and less on the results of comparable transactions in the past.

In valuation of the fair value of the Company's investment property, the external independent qualified valuator relied on the following valuation techniques:

- For the "Samacki Hotel" complex: the cost approach, since there is no other property to be used as comparative properties and since the income approach fails to produce realistic results;
- For the "Stari Merkator" office space: the comparative approach, since the income approach could not be applied, because the investment property in question has not been rented.

As at the balance sheet date, there are no limitations pertaining to the sales potential of the investment property in question, nor any limitations pertaining to generating income from the property rent or disposal.

Investment property in the amount of RSD 625,510 thousand refers to the following facilities:

- The "Samacki Hotel" complex, with the total area of 8,034.00 m², with the municipal construction land use rights for the total area of 18,598.00 m², in 24 Batajnicki Put Street in Zemun in the amount of RSD 541,549 thousand. Income amounting to RSD 7,274 thousand was generated from the rent of the property in question to Energoprojekt Visokogradnja Company in the reporting period (Note 7.2.).
- The "Stari Merkator" office space with the total area of 643 m², in 5 Palmira Toljatija Street in New Belgrade in the amount of RSD 83,961 thousand. In the reporting period, this property was not rented. Due to the present inauspicious situation for the rent of property in the Republic of Serbia, it has been quite difficult to find adequate tenant for this property.

Deferred tax assets and liabilities	In RSD thousand	
	30/06/2017	31/12/2016

Deferred tax liabilities	155,288	155,288
Net effect of deferred tax assets (liabilities)	(152,252)	(152,252)

Deferred tax assets are the income tax amounts recoverable in future periods based on *deductible temporary differences*.

A deductible temporary difference is generated in cases where a company's balance sheet contains already disclosed expense on certain bases, which will be recognized from the tax aspect in the following periods. Deferred tax assets are verified on December 31 and are recognized only if it is considered probable that the deferred tax assets will probably be used to reduce a taxable income in the future period.

The amount of deferred tax assets is calculated by multiplying the amount of deductible temporary difference at the end of the year by the Company's corporate income tax rate (15%).

Deferred tax liabilities disclosed as at December 31 refer to *taxable temporary differences* between the book value of assets subject to depreciation and their tax base. Due to different provisions used in the Company to define accounting depreciation (in compliance with the IAS/IFRS and other provisions) and provisions that define tax depreciation (in compliance with the Law on Corporate Income Tax), the Company shall pay higher amount of income tax in the future period than it would pay if the actually disclosed accounting depreciation would be acknowledged by tax legislation. For this reason, the Company recognizes the deferred tax liability, which represents income tax payable once that the Company "recovers" the accounting value of the assets.

The amount of deferred tax liabilities is calculated by multiplying the amount of taxable temporary difference at the end of the year by the Company's income tax rate (15%).
